

Significantly Increase Processing Capacity in an Environmentally Responsible Way

CONTINUOUS EXTRACTION SYSTEM FOR HEMP & CBD

Meet growth targets and lower manufacturing costs with CPM Crown's expertise.

Maximize your market opportunity with Crown. As a global leader in oilseed extraction for 75 years and botanical extraction for 30+ years, Crown delivers expertise in engineering, equipment, processing, piloting, product development, training and aftermarket support. **From hemp preparation to CBD extraction – full and broad spectrum oils** – Crown gets you up and running fast at input capacities ranging from 5 to 50+ MTPD with >99% solvent recovery and minimal labor requirements. Partner with Crown and leverage the proven performance of a global leader.

Scale-Up Fast to **Profitability** with Crown.

Crown's Continuous Extraction System for Hemp & CBD Oil advantages:

- Continuous process backed by 75 years of oilseed extraction and 30+ years of botanical extraction with a proven reputation as a trusted, innovative partner
- Scalable from 5-50+ MTPD input capacity to keep you on track with growth targets
- Fast speed to market, typically 4 to 9 months
- Environmentally responsible: >99% solvent recovery from oil and spent biomass with Crown's energy-saving desolventizing system
- Optimized for maximum oil extraction with lowest total operating costs
- Low labor requirements: only 2 plant operators needed
- Multiple solvent options tailored to operational needs
- Piloting capabilities from bench top to multiple tons per day, simulating real-world processing in a controlled, confidential environment
- Developed by a global leader in extraction with a proven reputation as a trusted, innovative partner
- Good Manufacturing Practice (GMP) compliant
- Extremely safe to operate - Class 1, Division 1 Certification for explosion proofing and safety

For game-changing innovation, partner with Crown.

CPM Crown's Global Innovation Center is a facility unlike any other. A fully functional 15,000 sq. ft. pilot plant, analytical lab and training facility, the GIC offers piloting capabilities from benchtop lab scale to multiple tons per day of continuous production, simulating real life and enabling customers to develop and test new product concepts in a confidential, controlled environment. The GIC has capabilities in preparation, extraction, desolventizing, drying, deodorizing, refining, fat splitting, renewable diesel and specialty extraction (including Hemp CBD Oil). Crown's technical expertise, R&D and full lifecycle process provide guidance and support at every step from feasibility, trials and custom processing to commercial-sized operations and aftermarket.

Feeding, Fueling and Building **a Better World.**
